

## Shower Filter Installation Guide and Technical Information

Product Code: SH-CQ/3

\*Replaces previous models SH-HI, SH-LO, SH-HI01, SH-CQ, SH-CQ/2

**Chlorine Free Showers:** *Scientists warn, you can inhale and/or absorb chlorine vapours and other pollutants while showering. Tests show that the body absorbs more chlorine by taking a ten minute shower than by drinking 8 glasses of the same water.*

The **FreshWater Shower Filter** features KDF-55 'Golden sand media' which removes up to 95% of harmful chlorine and chemicals from the water, along with up to 98% of soluble heavy metals. This gives you a luxurious shower free of bleaching and harmful chemicals. The benefits are not only restricted to you health however.

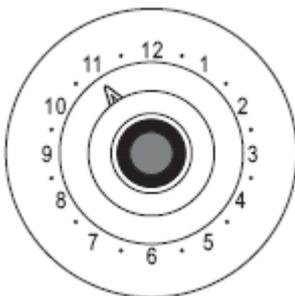

### Benefits....

People who have coloured hair and highlights will notice that without the bleaching effect of chlorine, the colour of their hair will stay more vibrant for longer. Expensive soaps and shampoos designed to be mild are counteracted by chemicals in water, experience their true effect with pure clean bathing water.

You will experience greatly reduced skin irritation when showering, even without the use of expensive bathing supplements. Vapours containing bleach will be nearly eliminated, therefore relieving any nasal irritation you may be suffering from.

### Features...

- 95% Chlorine reduction
- 98% Heavy metal reduction
- No internal bacteria growth
- Multi layered filtration
- Easy Installation
- Replaceable filter cartridge
- Useful renewal reminder numbers:

Twist the dial to correspond to the date you began using the shower filter. The shower filter should be changed after 12 months use.

### Parts & Specification:

Shower Filter

## Shower Filter Installation Guide and Technical Information

Product Code: SH-CQ/3

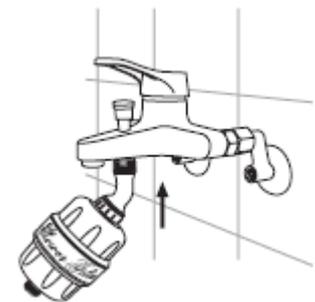

### Installation Instructions:

1) Screw the extension elbow into the shower filter

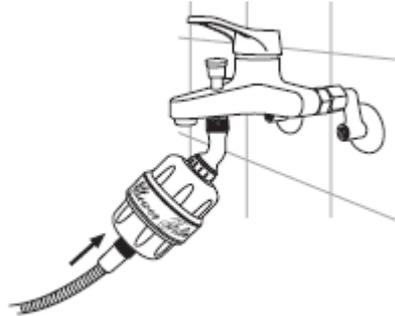

2) Unscrew your shower hose from the body of your shower. (This could be in various locations depending on your shower)

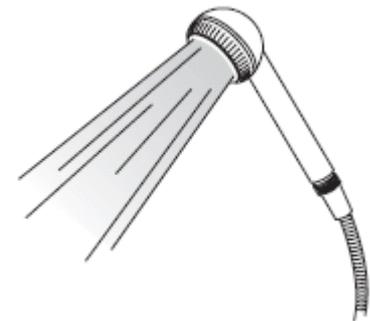

3) Attach the shower filter to your shower

4) Ensure filter is fastened securely

5) Connect your shower hose into the end of the shower filter

6) Allow the shower to run for between 30 seconds and 1 minute before use.

### Replacing the Filter:

Replacing the filter inside the FreshWater shower filter couldn't be simpler:

1. Remove the shower filter
2. Twist the shower filter anti-clockwise to open
3. Remove the used filter and insert the new filter
4. Screw the shower filter back together
